

Our Curriculum & Learning Approach

At Revival Place School of the Arts, we believe every child is uniquely created by God with individual gifts, learning styles, strengths, and potential. For this reason, we have carefully selected an educational model that allows students to receive personalized instruction, strong academic foundations, character development, and individualized learning support within a safe and nurturing Christian environment.

For our foundational academic program, Revival Place School of the Arts utilizes the A.C.E. (Accelerated Christian Education) curriculum model as part of our microschool educational structure.

What is the A.C.E. Curriculum?

The A.C.E. curriculum is a well-established Christian educational system used by schools in the United States and around the world for over 50 years. This curriculum is designed to provide students with individualized, mastery-based learning while maintaining strong biblical values and academic structure.

Rather than forcing every child to learn at the exact same pace, the A.C.E. system allows students to progress according to their individual level of understanding and mastery.

This model is especially beneficial within a microschool environment, where smaller class sizes and personalized instruction create opportunities for students to receive greater academic attention and support.

Benefits of Our Educational Model

Individualized Learning

Each student progresses according to his or her academic level and learning pace. This allows students to build confidence, strengthen comprehension, and avoid unnecessary academic gaps.

Small Group Environment

Our microschool model allows for lower student-to-teacher ratios, providing students with more personalized attention, guidance, and academic support throughout the school day.

Strong Academic Foundations

Our program emphasizes core academic skills such as:

- Reading
- Phonics
- Mathematics
- Grammar
- Writing
- Biblical studies
- Character development

Students are encouraged to master concepts thoroughly before advancing to new material.

Development of Responsibility & Independence

Students are taught to develop responsibility, organization, goal-setting, and independent work habits, valuable life skills that prepare them for future academic and personal success.

Christian Worldview

Biblical principles are integrated throughout the learning experience. Our goal is not only academic growth, but also spiritual formation, integrity, character, and Christ-centered values.

Creative & Artistic Integration

At Revival Place School of the Arts, education extends beyond textbooks. Students also participate in creative arts experiences designed to cultivate expression, creativity, confidence, collaboration, and appreciation for the arts.

Depending on grade level and program availability, students may participate in:

- Music
- Worship arts
- Theater
- Creative expression
- Performance opportunities
- Media and artistic enrichment activities

Our Commitment to Excellence

While curriculum is important, we believe the true strength of education comes from the combination of:

- strong leadership,
- intentional instruction,
- individualized care,
- parental partnership,
- and a healthy learning environment.

At Revival Place School of the Arts, we are committed to creating an atmosphere where students are:

- academically challenged,
- spiritually encouraged,
- creatively developed,
- and personally valued.

We understand that choosing a school is one of the most important decisions a family can make, and we are honored by the trust families place in us to partner in the education and formation of their children.

Thank you for considering Revival Place School of the Arts as part of your child's educational journey.
